

Second Meeting in Málaga, Spain on the 25th & 26th of April 2016

The second international meeting of the Project “Developing EU through online innovation” was celebrated in Málaga. IPF International Consulting were the organising partners.

The meeting focused mainly on the development of the new steps in our project. Each of the countries participating in the project presented their first three chapters of their agendas and the other participants gave their feedback

and discussed any improvements that each chapter may need.

Moreover, many issues related to the development of this project were spoken, including the obligations and responsibilities of each country. The design, by the Italian partners and advertising methods were analysed and we discussed the best way to reach the target group.

It was a very dynamic meeting in a unique environment and it was very beneficial for the evolution of our project.

These International meetings are the perfect way to evolve and make the project grow in the best possible way.

From this all the participating partners agreed that online education is growing!
